

Vision

To become a global provider of web based ERP systems to small and medium industry. Not only garment and textile but other small industries that have migrated to the developing world. The systems will promote best practice methods and be available at affordable prices to the manufacturers. To work with Industrial Chambers and Federations all over the world to introduce these systems and train industry members on the benefits involved in applying these systems. In applying these systems we will improve efficiency, increase profit, increase labor income and reduce waste which will have an overall positive return on the whole community where this business is located and allow the business to compete on a global level.
